Summary

BCA (Hons) student with hands-on experience building full-stack web applications and machine learning systems, including RESTful API integrations, real-time data pipelines, and CNN-based classification models in Python. Skilled at developing dashboards, automating data workflows, and collaborating cross-functionally to ship reliable, production-ready features. Seeking a full-time Core Technology associate role focused on software and data accuracy.

Education

CHRIST (Deemed to be University), Bengaluru	Jul 2023 – May 2027 (Expected)
BCA (Hons) – Computer Applications	GPA: 3.08 / 4
Dony Polo Public School, Patna (CBSE)	Apr 2023
Class XII – Science (PCM)	64.8%
Dony Polo Public School, Patna (CBSE)	Apr 2021
Class X	91.4%

Research Papers

Confidence-Aware and MobileNetV2 Approach for Vegetable Seed Classification	Dec 2025
CNNs and multimodal imaging for non-destructive agricultural seed analysis.	
Deep Learning-Based Apple Variety Classification	May 2026
Transfer learning and hyperparameter optimization for market-grade apple identification.	

Work Experience & Internships

Christ University, Bengaluru	Nov 2025 – May 2026
<i>Data Analyst – AI/ML Intern, Marketing & Brand Strategy</i>	
Developed machine learning models for traffic pattern analysis and image classification; built CNN architectures and interactive visualization dashboards from large-scale datasets.	
DataArt, Bengaluru	Oct 2025 – Jan 2026
<i>Full Stack Developer</i>	
Built a departmental management system using React and Supabase; implemented role-based access control (RBAC), real-time data synchronization, and RESTful API integrations.	

Projects

Real-Time Traffic Analysis	Jun 2024 – Sept 2024
<i>Python, Scikit-learn, TomTom API</i>	
Built a machine learning-based traffic analysis system that processes real-time traffic data, classifies congestion levels, and visualizes traffic patterns.	
Object Detection System	May 2026 – Jun 2026
<i>Python, OpenCV, YOLO, Flask</i>	
Developed a computer vision application for real-time object detection and localization using deep learning models, with image upload, inference pipeline, and web-based prediction interface.	
ImageClassify-CIFAR10	Oct 2025 – Dec 2025
<i>Python, TensorFlow, Streamlit</i>	
Built a CNN-based image classifier (78% accuracy) with a Streamlit interface for real-time predictions and confidence scoring.	
Apple Variety Classifier	Jan 2026 – Mar 2026
<i>Python, TensorFlow, Keras, CNN</i>	
Built a CNN classifier for 10 apple varieties using transfer learning, data augmentation, and hyperparameter tuning.	

Skills

Technical: Python, Git, SQL, Docker, Hugging Face, ML Fundamentals, AI Automations, Figma
Domain: Computer Science and Application, MLOps, ML Data Filtering, Detection Modeling
Soft Skills: Leadership, Problem Solving, Cross-functional Collaboration, Public Speaking
Languages: English – Proficient (C1), Hindi – Fluent

Certifications & Training

Generative AI – Google	Mar 2025
Back-end Frameworks and APIs Certificate – Lnt Group	Jun 2024

Co-curricular & Leadership

Samagra, CHRIST University, Bengaluru	Jun 2025 – Mar 2026
<i>Lead, Stage Team (Console)</i>	
Led an 8-member team; organised 4 inter-college events (1000+ participants) and managed console work.	
SWO, CHRIST University, Bengaluru	Jun 2024 – May 2025
<i>Head of Stage Team</i>	
Led a 38-member team; organised 1 national and 9 inter-college events (1000+ participants) and managed console work.
