PROFESSIONAL SUMMARY

Detail-oriented BCA (Honours) student specializing in cybersecurity, skilled in vulnerability assessment, log analysis, and penetration testing. Proficient in Python and Java for automation, with hands-on experience from CTF competitions and security labs. Seeking a Cybersecurity Intern role to contribute practical security solutions, learn under expert mentorship, and strengthen organizational cyber resilience.

EDUCATION

Bachelor of Computer Applications Honours (BCA Hons) | Christ University, Bengaluru | Expected 2027
State XII (PCMB) | Christ Junior College, Bengaluru | 2023

SKILLS

Cybersecurity Domains: Risk Identification, Vulnerability Assessment, Security Policy Awareness, Compliance Fundamentals, Incident Response Basics
Tools & Platforms: Nmap, Wireshark, Burp Suite, Kali Linux, Autopsy (for forensic/log analysis)
Productivity & Analysis: MS Office (Excel: PivotTables, VLOOKUP), Technical Documentation, Report Writing
Concepts: OWASP Top 10, Network Security Fundamentals, Secure System Design Principles
Programming: Python, C++, Java (used for automation and data parsing tasks)

CERTIFICATIONS & TRAINING

Ethical Hacking - L&T Edutech | May 2024

- Conducted network discovery and vulnerability assessment using Nmap.
- Learned fundamentals of port scanning, service enumeration, and basic exploit identification.

MERN Stack Development Workshop | Jan 2025

- Gained hands-on exposure to MERN stack (MongoDB, Express, React, and Node.js).
- Explored secure coding practices and security-aware development principles in web application contexts.

TECHNICAL PROJECTS

Network Vulnerability Assessment Project

- Performed systematic port scanning and service enumeration to identify open attack surfaces.
- Documented risks in a clear, structured report with severity ratings and actionable recommendations.
- Used Excel (PivotTables) to categorize and summarize vulnerability data by service type and risk level.

Quit Buddy - Substance Abuse Risk Assessment System (Mini Project)

- Developed a web-based risk assessment system using Python, HTML, CSS, and MongoDB.
- Enhanced with **React.js** and an **AI chatbot (Gemini API)** for personalized user support.
- Integrated Supabase to manage dashboards, posts, stress calculators, and appointment booking.

Log & System Analysis Practice (TryHackMe)

- Completed labs involving log review, anomaly detection using Wireshark and Autopsy.
- Able to translate technical findings into plain-language summaries for non-technical stakeholders.

ACHIEVEMENTS & COMPETITIONS

- 1st Prize – Shadow Protocol (CTF) | Abhyuday 10.0, M S Ramaiah University of Applied Sciences
- 1st Prize – FlagFest (CTF) | Syntaxia 2026, St. Joseph's University
- 1st Prize – CyberX (CTF) | IFIM School of Technology
- Active participant in multiple IT fests across Bengaluru.
